KEITUMETSE SETATI

Junior Software Developer

keitumetsecezil16@gmail.com 068 328 3657 Johannesburg, South Africa

Category C (C1 / Code 10)

PROFESSIONAL SUMMARY

Junior Software Developer with approximately 8 months of professional backend development experience at Direct Transact. Experienced in C#, ASP.NET Core Web API, Entity Framework Core, SQL Server, RESTful APIs, stored procedures, validation, unit testing, debugging and code reviews. Hands-on familiarity with Microsoft Azure Portal and Azure DevOps in a professional development environment, including exposure to repositories, CI/CD pipelines and application deployment workflows. Microsoft Certified: Azure Developer Associate (AZ-204) and Azure Fundamentals (AZ-900), with a strong foundation in backend development, database integration, API design and secure software development.

PROFESSIONAL EXPERIENCE

Direct Transact, *Junior Software Developer* 02/2026 – 09/2026 | South Africa

- Develop and maintain backend functionality using C#, ASP.NET Core Web API, Entity Framework Core and SQL Server in a production-oriented development environment.
- Build and improve RESTful GET, POST and PUT endpoints, including request validation, response models, error handling and appropriate HTTP status-code behaviour.
- Develop and integrate SQL Server stored procedures and data-access logic, including validation rules, joins and database changes required by API features.
- Investigate and resolve defects involving incomplete responses, validation gaps, duplicate records, optional request data, pagination metadata and API contract consistency.
- Write and maintain unit tests, test APIs with development tools, retest fixes, and participate in peer code reviews to improve reliability and maintainability.
- Contribute to database restructuring, code refactoring, dependency/framework updates, external integration validation and sprint/Agile activities.
- Apply secure development practices, including careful handling of configuration and sensitive values; gained hands-on familiarity with the Azure Portal and Azure DevOps through professional development work, including repositories, CI/CD pipelines and deployment workflows.

EDUCATION

Belgium Campus iTversity, *Bachelor of Computing: Software Engineering* 02/2023 – Present | Pretoria

- Four-year programme (three academic years plus one year of industry training); expected graduation: 2027.
- Relevant coursework: Object-Oriented Programming, Data Structures & Algorithms, Web Development, Database Systems, UML Design, Software Engineering Lifecycle and Project Management.

TECHNICAL SKILLS

Backend (C#, .NET / ASP.NET Core Web API, REST APIs, Entity Framework Core) | **Database** (SQL Server, T-SQL, stored procedures, joins, relational databases; PostgreSQL, MongoDB) | **Cloud & DevOps** (Microsoft Azure, Azure Portal, Azure DevOps, Git/GitHub, repositories, CI/CD pipelines, deployment workflow exposure) | **Testing & Quality** (Unit testing, API testing, debugging, validation, HTTP status codes, code reviews, defect resolution) | **Other** (Python, Java, JavaScript, Node.js, Express.js, React.js, HTML, CSS, Agile/Scrum, SDLC, OWASP/API security awareness) | **Tools** (Visual Studio 2022, SSMS, Bruno, Postman, VS Code, IntelliJ IDEA)

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate (AZ-204) (Earned Jul 2026; certification valid through Jul 2027.) | **Microsoft Certified: Azure Fundamentals (AZ-900)** (Earned May 2026.) | **Cybersecurity Essentials** (Cisco Networking Academy, 2021.) | **Introduction to IoT** (Cisco Networking Academy, 2022.)

ACHIEVEMENTS & LEADERSHIP

- Recipient of the Dimension Data (now NTT DATA) bursary for academic performance and leadership potential in Software Engineering.
- Selected for the Dimension Data Saturday Schools Programme based on academic excellence and potential in technology and innovation.
- Former SRC member; represented students and contributed to academic discussions and decision-making.

PROJECTS

Inventory Management System
Developed stock-tracking and order-management functionality for a retail/franchise scenario.

Student System App (C#)
Built functionality for attendance, grades and student profile management.

Community Portal
Built a Node.js, Express.js, MongoDB and EJS web application for events, discussions and resource sharing.

Linear & Integer Programming Solver
Developed a .NET console application implementing optimisation algorithms.

Anti-Sleep IoT System
Final-year project focused on detecting driver drowsiness and generating alerts to support road safety.
